- 1 CNC G10 center fin
- 3/4 deck pad
- Leach plug
- FCS Twin fins
- Reinforced tuttle box

SPECIFICATIONS

WINDSUP RIDE 8'11

Volume	144 litres
Length	272 cm / 8'11"
Width	72 cm / 28"
Weight	10.87 kg (+/-6%)
Center fin	25 cm US box
Tuttle box	Reinforced
Side fin	2 x FCS 11.9 cm

CONSTRUCTION

- Custom construction
- CNC shape EPS
- Carbon Biaxial 160 gr construction on 100 kg/m³ PVC deck and bottom

TEAM ADVICE

- Advanced to Expert SUPer, take away around 40 to 60 kg of body weight from the board volume
- Example: 110 liters - 50 kg= Max body weight of 60 kg (+ 10 kg for expert)
- Windsurfer will enjoy using board in single fin mode
- Forward footstraps position for SUP mode design to find instantly the correct foiling position

PRO AM

1. Unfinished sanded
2. Glass # 60gr
3. Wood & glass # 160gr patch
4. Carbon patch & glass Bi-axial # 160gr
5. PVC 80 kg/m³
6. Glass # 200gr patch
7. Glass # 60gr
